Property Management • Point-of-Sale • Inventory & Procurement • Document Management • Workforce Management • Mobility

*Agilysys is a leader in transforming the guest service experience.*

With the right software, you can improve the quality of guest service through technology innovation that enables you to win the guest recruitment battle against your competition, maximize wallet share and engage guests pre-arrival, in the moment and post departure.

Agilysys develops market-leading, industry-specific solutions to help you manage and grow your business. Our systems offer unparalleled reliability, functionality and control over every aspect of your operation, including property management, point-of-sale (POS), dining reservations, inventory & procurement, analytics, labor management, self-service, document management and more.

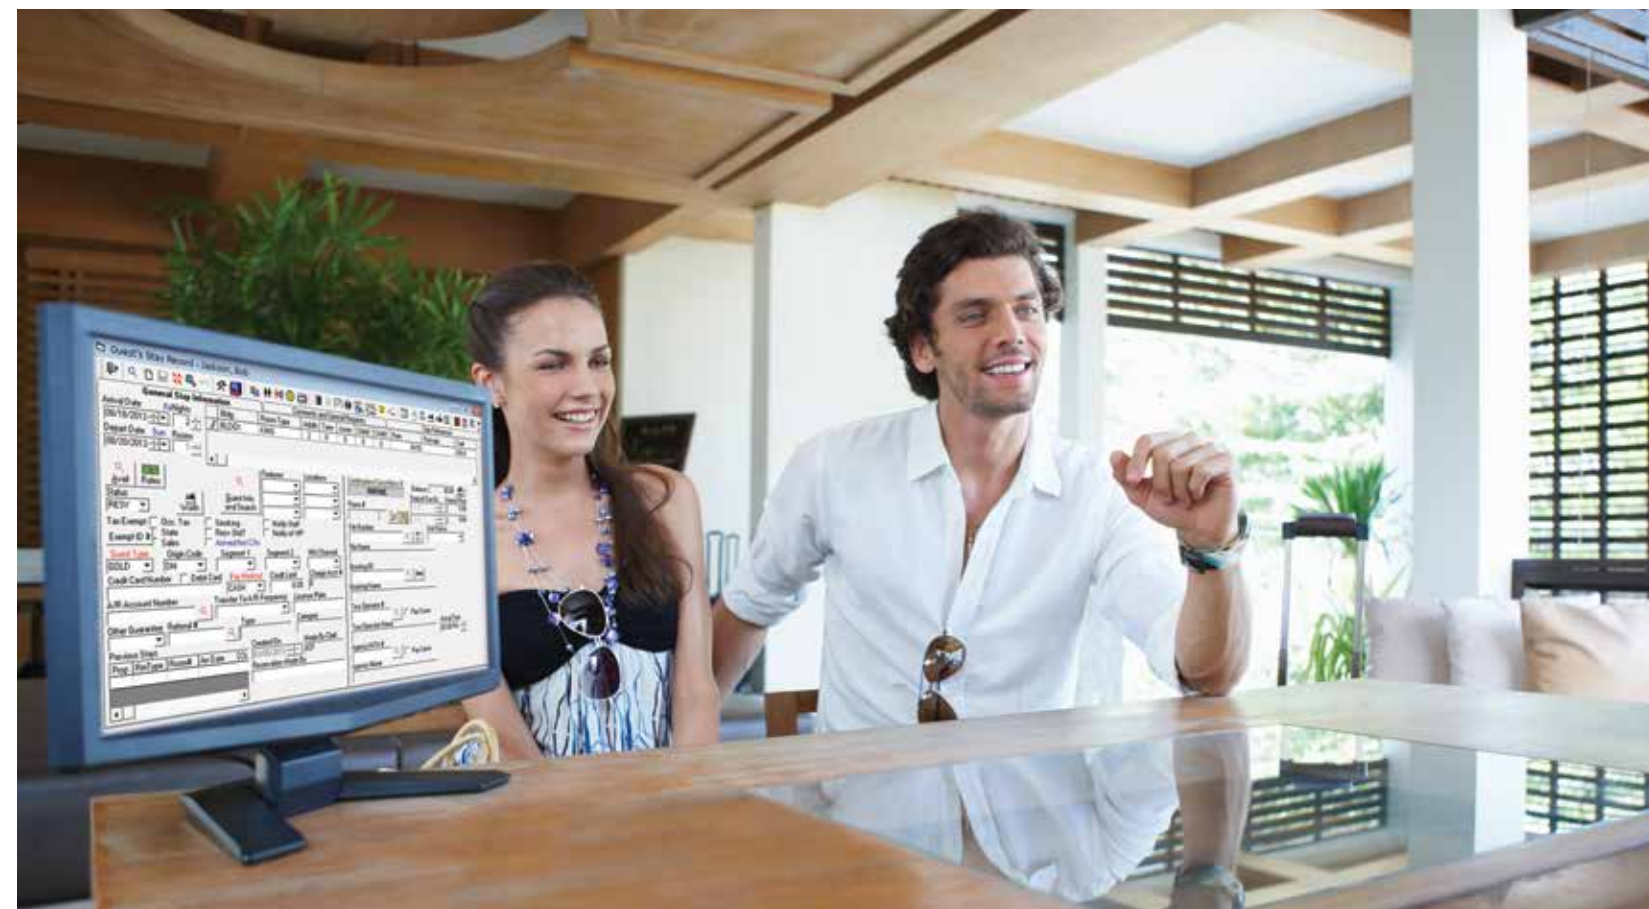

*Gain control over your operations and deliver unsurpassed guest service.*

 **LMS** Agilysys Lodging Management System<sup>®</sup> (LMS<sup>®</sup>), recognized as one of the hospitality industry's premier property management software systems, automates every aspect of hotel operations, from reservations and credit card processing to accounting and housekeeping. Its foundation expands to incorporate modules for sales and catering, activities scheduling, food & beverage sales, attraction ticketing and more. Ideal for properties of 1,000 rooms or more, LMS is designed specifically to help you manage your enterprise more efficiently. The solution runs 24/7 and links customers' gaming accounts to hotel accounts for evaluating comp decisions. It's Web-enabled, with a versatile foundation that supports a Hotel Technology Next Generation (HTNG) standard application programming interface (API). Premier properties, including the world's largest and most renowned, rely on LMS to increase productivity, maximize revenue per guest and ensure repeat business.

 **VisualOne** Agilysys Visual One<sup>™</sup> PMS provides an enterprise-wide, integrated solution for full-service resorts and hotels. The software is feature-rich and interfaces to Internet Distribution Systems (IDS) through Hotel Technology Next Generation (HTNG) standards, which makes your rooms available to more marketing channels for increased exposure. With interfaces to leading global distribution systems (GDSs) and other Agilysys products, Visual One PMS offers a reliable, scalable solution for full-service resorts and hotels ranging from 50-1,500 rooms. Add any mixture of modules, including spa, golf, activities or condo, to create the ultimate property-wide or chain-wide management solution, enabling improved guest relationship management, enhanced business performance analysis and increased profitability.

# Point-of-Sale

## Increase efficiency and maximize profits

**Agilysys InfoGenesis™ POS** is an award-winning point-of-sale solution designed to help you serve your guests more effectively while enhancing your efficiency and profitability. The system is easy to set up and maintain, and its scalable architecture enables you to add workstations without having to build out expensive infrastructure. The software integrates easily with a wide variety of other applications, and is designed to process transactions in the highest volume environments without any loss of performance at the point of sale. Rare offline capabilities allow the POS terminal to continue to perform well during intermittent server or network outages, synchronizing data as soon as your network connection is reestablished. Superior check management and on-floor reporting, along with consistent terminal configuration, pricing and screen setup, combine to give your frontline staff the tools they need to provide exceptional guest service across your entire organization. Item images on buttons make ordering fast and easy. InfoGenesis POS is available as an on-premise or Software-as-a-Service (SaaS) solution.

**New! InfoGenesis Flex®.** InfoGenesis POS now has full POS functionality on the Lenovo® ThinkPad® Tablet 2. This option provides a dependable, feature-rich, mobile experience for foodservice operators and service staff. Leverage as a slim fixed terminal or use as a convertible by removing it and going mobile. Waitstaff has all the tools they need to serve guests more efficiently while managers have access to administrative tools to ensure streamlined operations. For outlets where power is not accessible or space is limited, running InfoGenesis POS on a kiosk or in a stall with the new Lenovo ThinkPad Tablet 2 is an ideal solution.

**Agilysys InfoGenesis Mobile 2.0** is a mobile point-of-sale (POS) solution that seamlessly integrates with Agilysys InfoGenesis POS software. The application is reliable, sleek and easy to learn, with a user interface that's intuitive and simple to configure. Orders are automatically sent to the kitchen, enabling faster service and increased table turns. InfoGenesis Mobile 2.0 is a flexible, cost-effective tool to help service teams become more efficient and productive.

**Agilysys Elevate™** is a Web-based, next generation point-of-sale (POS) solution that operates in the cloud for ease of deployment and remote updates. A great solution for any single pass environment, the software leverages the best of modern interface features for a clean, smooth and intuitive user experience. Elevate provides users with access to operational data in real time from any location. Make changes to menus or prices quickly and easily, and then deploy them at any time without needing to reboot the system. With offline capabilities, including credit card payment acceptance, Elevate is an ideal choice for simpler service outlets that don't want the expense of traditional on-premise POS software.

*Lower food and labor costs.  
Increase efficiency.*

**Agilysys Eatec**® is an inventory and procurement solution that provides core purchasing, inventory, recipe, forecasting, production and sales analysis functions as well as optional catering, restaurant, buffet management and nutrition modules in a single Web-enabled solution. Manage your inventory with a full-featured, Windows®-based, solution for foodservice operations of any size in any market, from restaurants to tribal gaming to universities. The Eatec system provides a centrally located suite of management tools that is accessible from any outlet in your organization. The software is available as an on-premise or Software-as-a-Service (SaaS) solution.

Agilysys EatecTouch is an optional software applet that operates on any Windows-based POS terminal, providing users with access to the Eatec application from any terminal location.

Agilysys EatecPocket is a Windows Mobile compatible application designed to work on a handheld wireless device, enabling users to perform inventory transactions. The software incorporates barcode scanner functionality for mobile updates of the database.

**Agilysys Stratton Warren System (SWS)** is designed to improve productivity while reducing labor costs and waste. The system manages the entire inventory and procurement process — from requisition to invoice — and integrates with most leading financial and point-of-sale software products. Maximize your organization's buying power by aggregating the purchasing of all departments and locations for mission-critical items, as well as for those hundreds of incidentals that add up to big dollars. SWS is available as an on-premise or Software-as-a-Service (SaaS) solution.

# Document Management

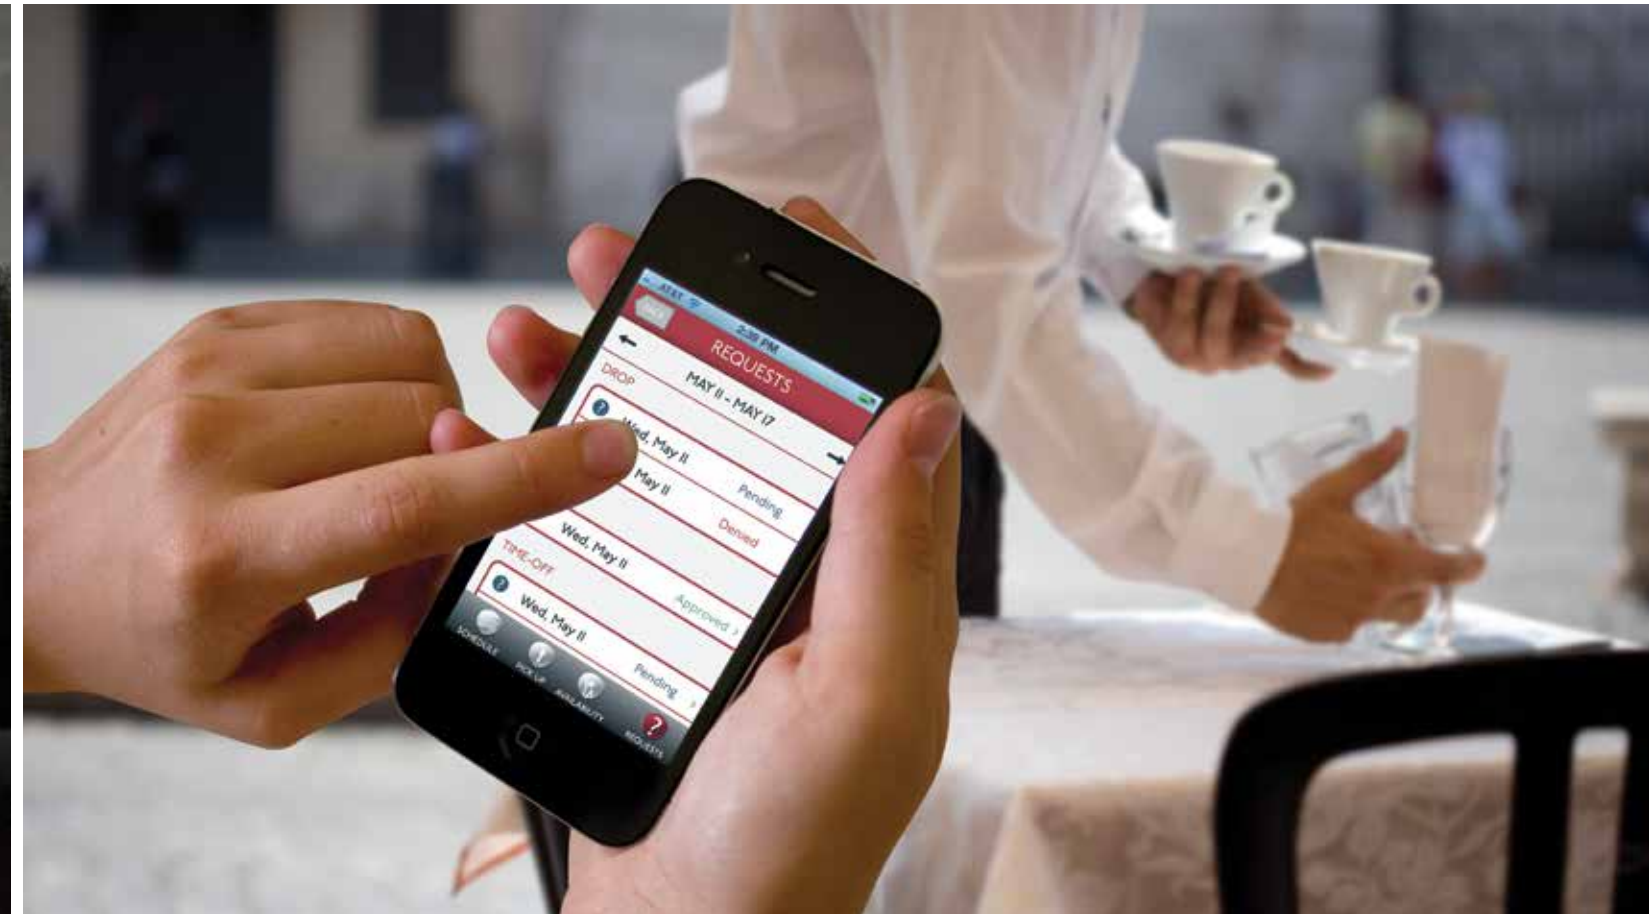

*Save paper, save trees, save storage, save money.*

**Agilysys DataMagine™** is a document management solution that transforms paper records into electronic images that are then archived for on-demand access. Increase security and functionality while realizing organizational process improvements. The software's U.S.-patented imaging module seamlessly integrates with your business applications, usually without writing or changing a single line of code. A cost-effective document management solution is something that virtually every business needs, whether it's to cope with increasing paperwork or to satisfy regulatory requirements. Revolutionize paper document storage and retrieval from an inefficient and expensive drain on your bottom line into a benefit that saves money while promoting environmental stewardship.

# Workforce Management

*Address your largest controllable cost: labor.*

**Agilysys Workforce Management Solution™ (WMx)** is an innovative and feature-rich suite of workforce management tools that help hospitality professionals improve decision making, reduce labor costs and empower employees while also aligning corporate best practices with their day-to-day activities. The software is accurate, mobile, customizable and easy to use. WMx is designed specifically to help hospitality organizations improve the efficiency and productivity of their workforce. Included are tools for performance-based scheduling, dynamic labor forecasting, embedded workflow for employee hiring, employee self-service, multiple time capture solutions and seamless integration to numerous POS, PMS, inventory and payroll systems, all of which combine to make doing business easier and more profitable.

# Activities

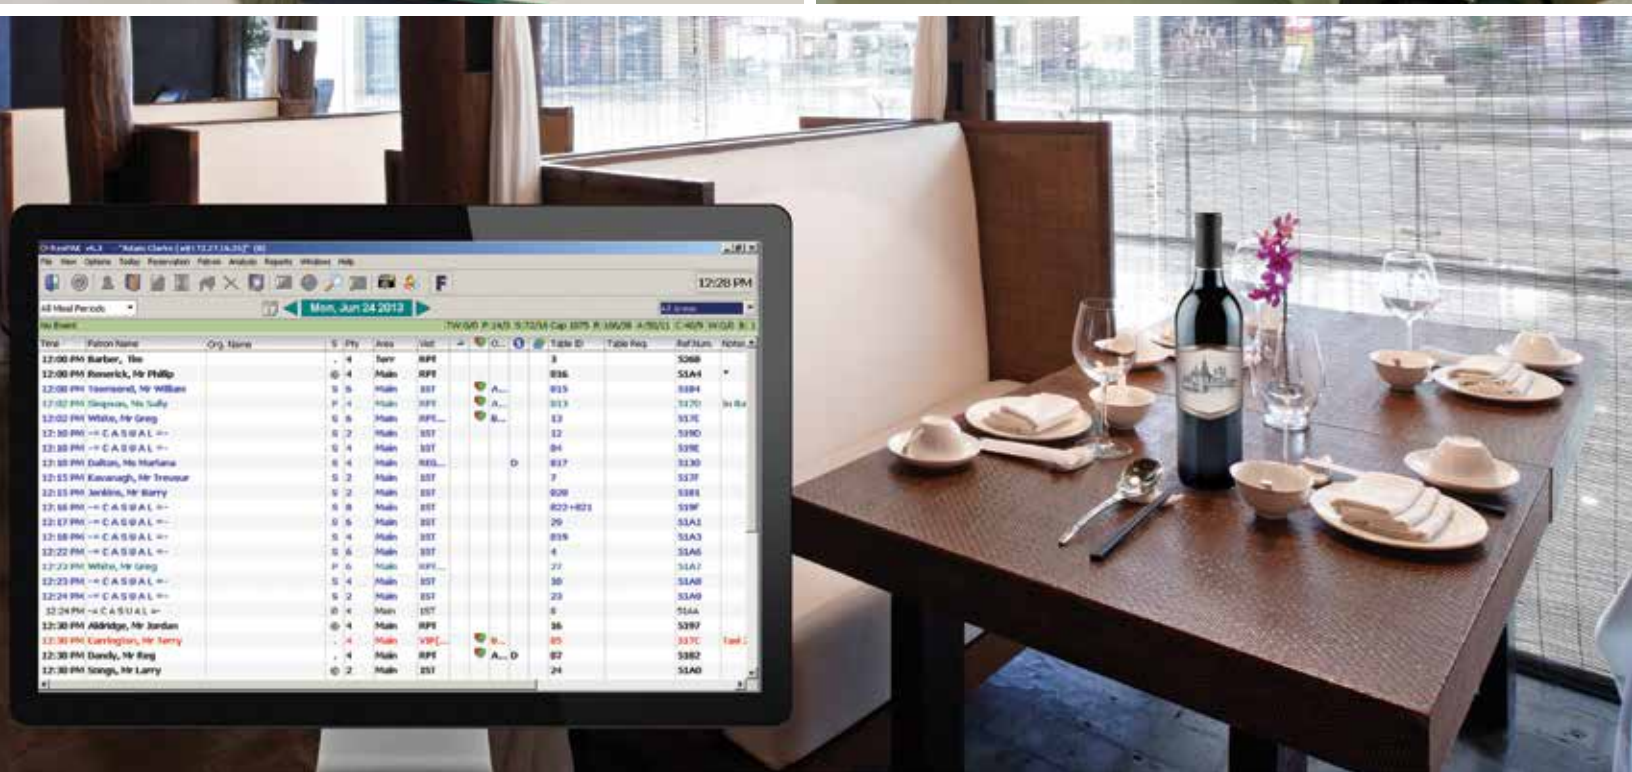

*Streamline management of your activities and offer your guests a VIP experience.*

**Golf** Agilysys GolfPro offers hotel and resort pro shop managers administrative tools such as tee time scheduling, member profile/billing, tournament management and Web and email access bundled into one solution that can integrate with your Agilysys PMS or work as a standalone solution. Manage product inventory and handle large groups of golfers with ease. Set up member histories, including financials, handicaps and records of purchases. An efficiently run pro shop can attract new customers, improve guest relationships and give you the competitive edge you need to maximize your revenue.

**Spa** For cruise ships, hotels and resorts that have an on-premise spa, **Agilysys Spa Management** covers all aspects of running the facility, from scheduling guests for services to managing staff schedules, maximizing efficiency and profitability. The system can be used as a standalone solution or launched from within either Agilysys PMS, letting your room reservationist book a spa appointment for your guest that will appear in the confirmation that is mailed or emailed to them.

**Dining** ResPAK, from AS Digital, is a complete restaurant management solution that is designed specifically to allow properties to minimize staff costs, increase operational efficiency and maximize revenue. ResPAK offers tools for reservation management, Internet reservations, table management, customer relations management (CRM), marketing and loyalty programs. The software is available in nine languages and can interface with a wide range of POS and PMS solutions.

## *Transform the guest experience.*

Selecting the right technology is more than simply choosing from a list of features. You need a vendor that develops software to address the unique needs and challenges of your industry. Agilysys specializes in helping customers in a variety of industries find just the right combination of end-to-end solutions to optimize productivity and profitability.

## *Increase the odds for your success.*

### Casino Resorts

With the right technology, casino resorts can leverage a wealth of information shared across solutions to engage customers and ensure loyalty. Power sound casino operations with seamlessly integrated software that streamlines operations and maximizes profits.

## *Simplify operations for smooth sailing.*

### Cruise Lines

Streamline high risk activity waivers and child care registration forms, enable servers to speed orders through with handhelds or create a convenient, cashless experience throughout the ship. Agilysys offers a wide range of solutions that can help cruise lines automate operations and improve the passenger experience.

## *Nourish your bottom line.*

### Foodservice Operations

Enhancing guest service secures loyal customers and encourages guests to spend more. Foodservice operators in corporate, grocery, healthcare and higher education dining outlets can choose from a variety of essential, integrated solutions to manage and grow their business.

# Markets Served

*Accommodate 5-star service.*

## Hotels & Resorts

Choose from a suite of integrated solutions that cover the breadth of hotel and resort operations and help maximize profitability. The right tools enable you to win the guest recruitment battle and personalize guest service.

*Use the Recipe for Success.*

## Restaurants

Differentiate yourself from your competition by reducing customer wait times, simplifying your processes and capitalizing on revenue opportunities. Whether they're sitting in your dining room or picking up an order at your front door, customers get what they need faster, without your needing to increase your labor force. Agilysys solutions offer ways to enhance the guest experience, which can increase customer loyalty and encourage repeat business for maximum long-term revenue.

*Automating operations helps you win.*

## Tribal Gaming

Partnering with the right technology vendor can smooth the transitions as you grow. Agilysys offers a variety of solutions that work together to help you engage your guests more effectively by providing personalized service that encourages repeat business.

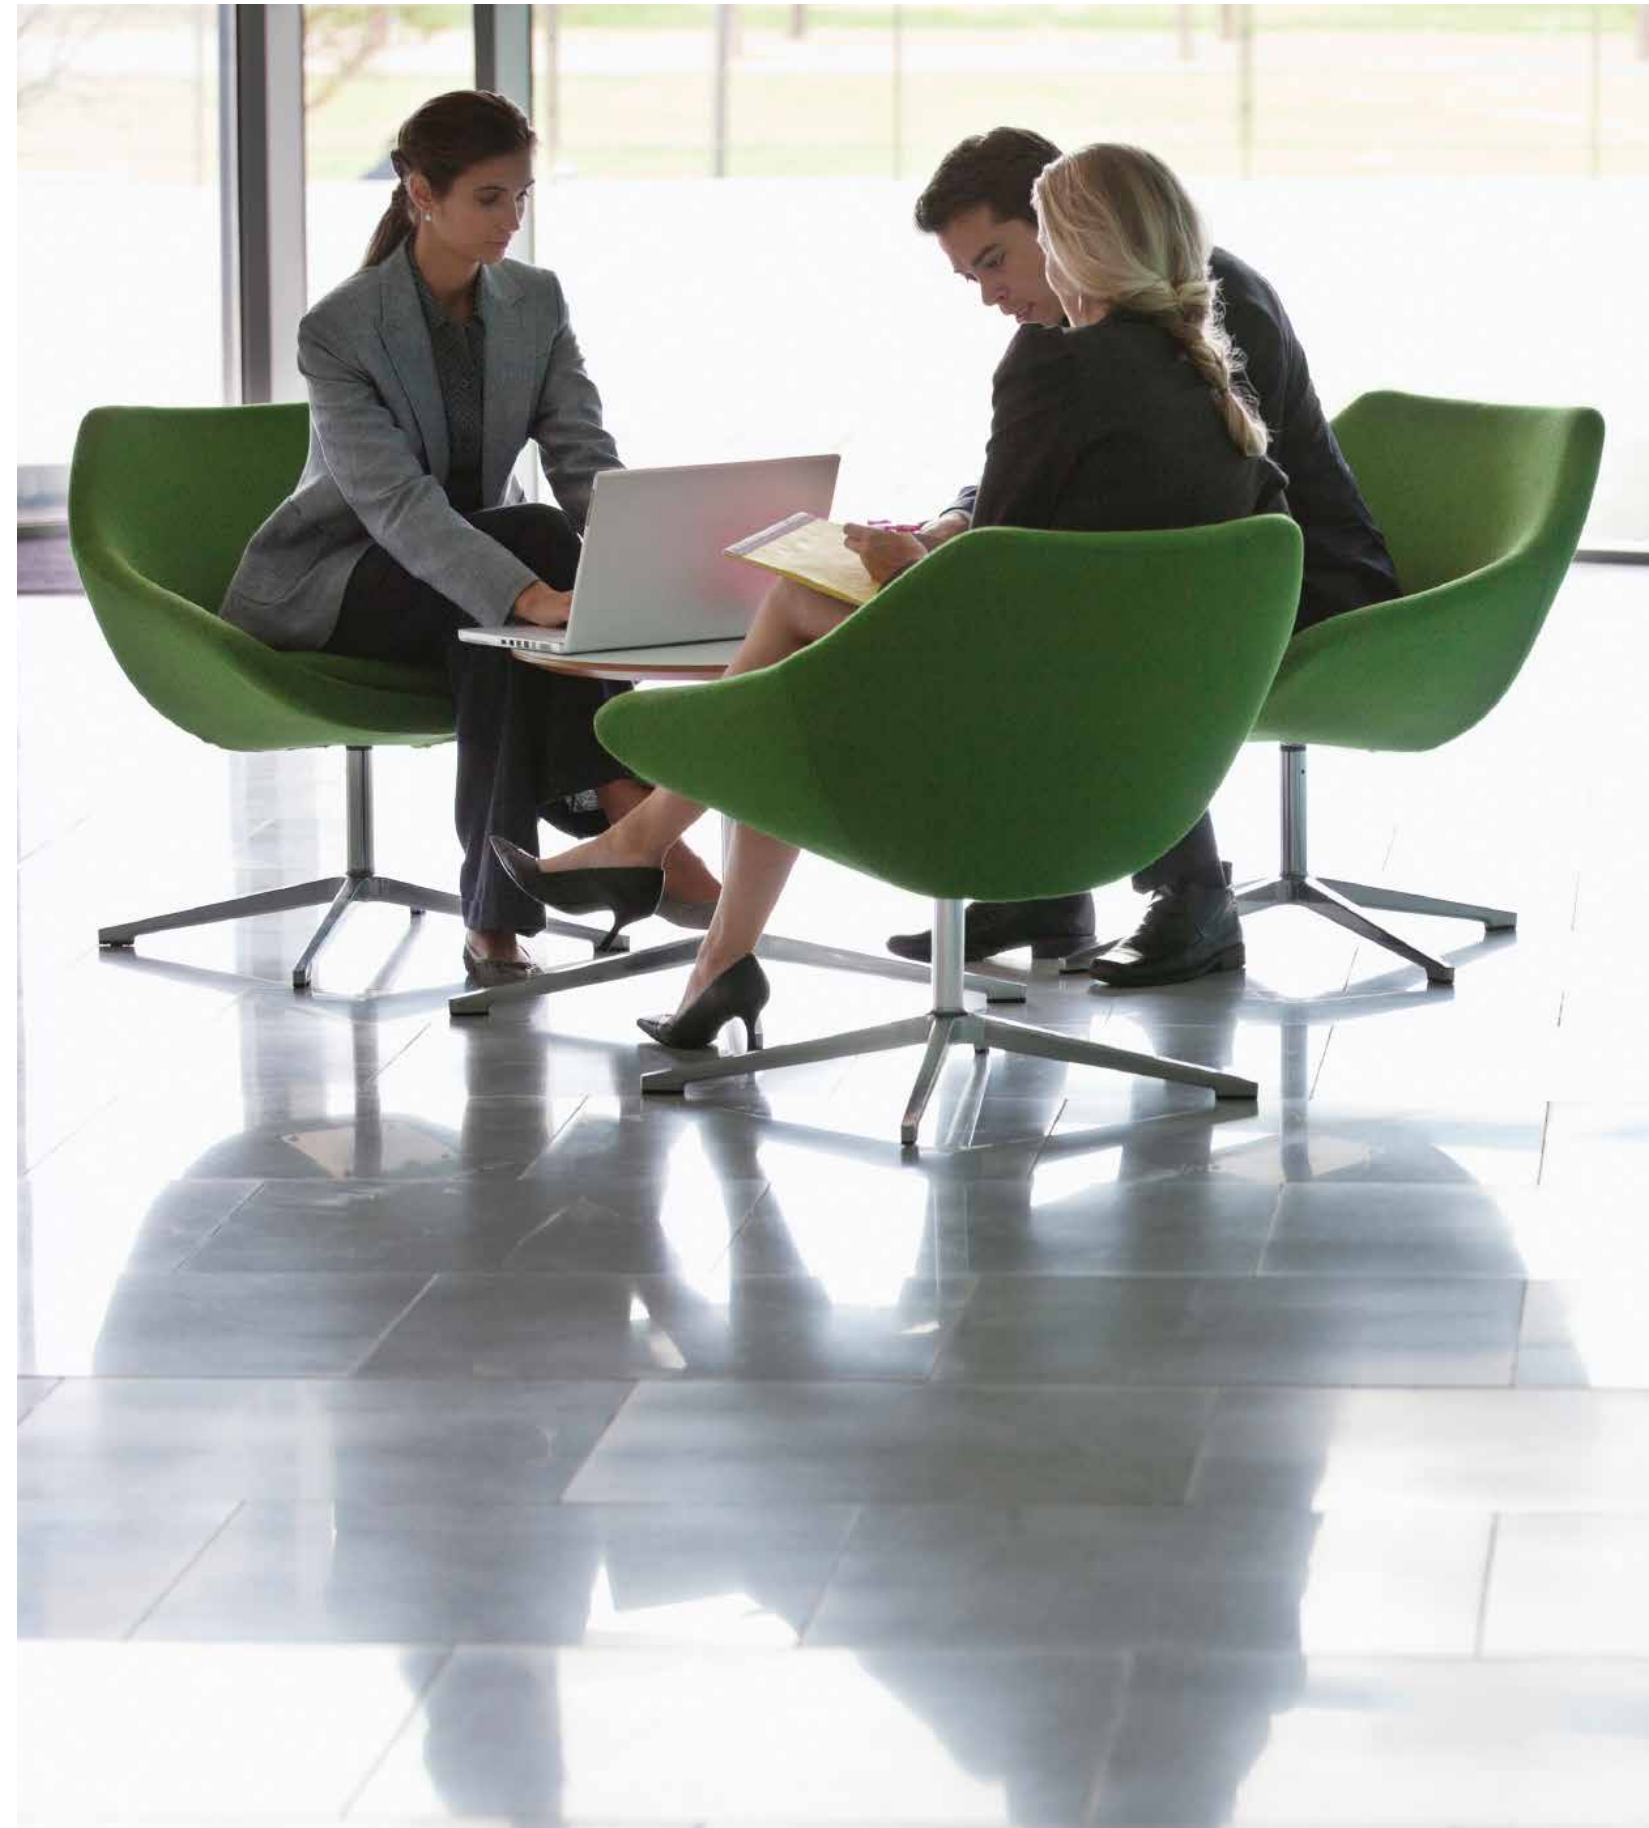

## *Maximize IT investments and resources.*

**Business Consulting** Agilysys has a full-service team of developers, systems analysts, network specialists, hardware engineers and consultants with the knowledge and experience to provide your property with practical and effective strategies. We combine the industry's best practices with casino and property deployment procedures to help you gain a competitive advantage. Reduce overall project costs and proactively identify and manage project risks.

**Disaster Recovery** Globalization, increased competition and the need to service customers 24/7 mean your core systems and data must be available at any hour. System backups and maintenance can be costly, but a complete loss of enterprise data and business systems in a disaster would be a catastrophic loss. Planning is essential. The Agilysys Disaster Recovery and High Availability team can provide you with solutions that protect your long-range success and survival. We work closely with some of the most respected software companies in the market to provide seamless implementation and first-rate support.

**Infrastructure** An investment in technology is more than the hardware and software you purchase. A secure and responsive IT infrastructure is critical to long-range success. The Agilysys Infrastructure Services team can help you maximize your technology investment. From new system planning to server consolidation, our systems consultants and engineers can provide the service and support you need to ensure that your mission-critical operations run smoothly and efficiently.

**Server & Storage Consolidation** The phenomenal growth in processing power and system capacity enables each new generation of servers to handle larger and more complex workloads. In addition, recent advances in open systems storage technology have resulted in the Storage Area Network (SAN), where high-speed fibre channel technology enables cross-platform concurrent access to high-capacity storage systems throughout your enterprise. By consolidating your storage systems and segregating workloads, you can lower staffing costs, standardize applications and business practices, increase control over enterprise data and system availability, simplify system administration and save money on maintenance and hardware/software licensing.
